

Intel® School Bus Road Show

Dear Parent,

You are invited to come and join us on the Intel Education School Bus Tour at **Moon Hall College at 3:15 PM on Tuesday 29th June 2010**. Come and find out about how technology is enabling your children to advance through their education and how assistive technology can benefit those with special education needs.

In cooperation with Intel affiliates, we will be showcasing the very latest technologies including:

The classmate PC www.classmatepc.com, a purpose-built netbook with full PC functionality, designed specifically for students

www.skool.co.uk the science and maths multimedia learning program for students and teachers

The Intel® Reader www.intel.co.uk/reader, a mobile handheld device designed to increase independence for people who have specific learning difficulties such as dyslexia, or have visual impairment as well as other assistive technologies for the classroom.

BigKeys keyboards, the specifically designed keyboard for those with motor difficulties, visual impairment, children in schools and those with a disability

SMART Board and SMART Sync, is designed to encourage and maximise the use of IT during any lesson

You can even see how this latest technology can integrate together in our 'classroom of the future' in a special parent session at 3:15 PM to see how technology can help your child. You are also welcome to look at demos at any time during the day.

For more information about the bus please visit www.bbl-events.co.uk/intelschoolbus

We look forward to seeing you there!

The Intel Education Tour Bus Team.

If you have any questions please contact Mycroft Smith at mycroft.smith@intel.com
